ISKO Excel ERP - what comes in each workbook, sheet by sheet

Target design for FY2027-28 · four workbooks · 90 sheets · screenshots of every sheet from the prototype workbooks · 27 Oct 2026

Workbook	Sheets	Entry pad	Register (values)	Balance (calculated)	Report	Master	Import (values)	Control	README / settings	Scope
1 ISKO Stores	30	5	8	3	0	6	3	2	3	Purchase order, receipt (GRN), lot QC, RM issue & return, consumables, authorised adjustments, stock balances.
2 ISKO Production	25	2	3	2	1	8	4	2	3	Cutting, bending, fabrication, rejection & rework, batch balance and close, transaction-calculated WIP.
3 ISKO Dispatch & Challan	21	3	6	2	0	4	2	1	3	Customer requirement, job-work challan, coater returns, FG balance, delivery challan.
4 ISKO MIS	14	0	0	0	9	0	2	1	2	Read-only reporting: refresh log, control tower, exceptions, stock/production/dispatch reports, trace, monthly pack.

One way of working in every book

1. Type only in the Entry pad sheets (cream cells). Every row shows lookups, available stock / batch / FG and a **Ready / issues** flag.
2. **Post** rows that read READY: they are copied into the Register as values with a permanent ID (macro button, or Copy > Paste Values).
3. **Refresh All**: the Balance sheets rebuild for open items and every hard stop reads them.
4. Corrections are reversal rows - posted rows are never edited or deleted.
5. Other books receive data only through Import sheets (Power Query, values) and MIS shows freshness in its Refresh Log.

Colour legend in the screenshots

cream: you type / pick · mint: calculated or snapshot, posted as value · grey: lookup shown for information · coral: hard stop - cannot post · amber: warning - needs authorised reason · teal: totals

Not in any book (removed from Phase 1): purchase requisition, print sheets and print buttons, Gmail / mail links and contact lists, physical stock / WIP / FG count sheets. No sheet protection, no freeze panes.

About the screenshots. They are genuine renders of the four **prototype .xlsx workbooks** built to this design (working Excel-2016 formulas, recalculated by LibreOffice when rendered), shown with row numbers and column letters. They use **sample / masked data** (IDs like GP-2728-0001, CUS-01, PER-007) and example dates in April 2027 - they are **not** live screenshots of the company's current files, and the live ERP has not been built yet. The coral and amber rows are deliberate examples showing each hard stop and warning. Full-size versions: *assets/prototype/*; the prototype workbooks: *prototype/*.

Will it work at 100,000 rows? - test results

Test run on 27 Oct 2026: the prototype workbooks were filled with synthetic data - **100,000 rows in every major register** (Stores: GRN, Lot QC, RM movements, consumable issues; Production: production register; Dispatch: JWC lines, coater movements, DC lines), 25,000 rows in the secondary registers, and open-item balances of 1,000 lots, 2,000 batches, 2,000 open JWC lines and 1,000 parts. About 900,000 rows across the three books. Timed in **LibreOffice Calc 24.2** on a 4-core, 15 GB machine (similar to an office PC). **Excel itself has not been timed** - repeat this test on the company's slowest PC before go-live.

Operation (at 100,000 rows)	1 Stores	2 Production	3 Dispatch	Target	Result
Typing in an entry pad (one cell, with all checks)	0.003 s	0.003 s	0.004 s	≤ 1 s	**PASS**
Post 20 rows into a 100,000-row register + rebuild balances	1.9 s	7.0 s *	3.4 s	≤ 20 s	**PASS**
Re-open the saved book	11.3 s	4.9 s *	9.3 s	≤ 20 s	**PASS**
Full recalculation of everything (rare)	16.7 s	7.5 s *	24.1 s	≤ 15 s	**Stores / Dispatch over - acceptable, only after a crash or Ctrl+Alt+F9**
Save the book	40.6 s	10.1 s *	32.7 s	≤ 15 s	**Over in LibreOffice - must be re-checked in Excel**
File size after save	31.1 MB	10.2 MB *	20.6 MB	≤ 25 MB	**Stores over - see note 3**

Answer: yes - the design holds 100,000 rows per register, because posted rows are plain values and only open items are recalculated. Daily work (typing, checks, posting, re-opening) stays within target at full volume. For comparison, the current books recalculate every historical row on each change: at 100,000 rows their heaviest formulas would do roughly 64 to 870 times today's work.

Conditions that came out of the test

1. *** WIP Balance must be built by Power Query at refresh**, not by live worksheet formulas. With live formulas, posting in Production took 25.7 s and a full recalculation 32.7 s; with Power Query: 7.0 s and 7.5 s (figures marked *).
2. **One financial year per file.** Real volumes are ~23,000 production rows and ~6,000 RM movements a year, so each book stays far below this test load.
3. The Stores test file held four 100,000-row and four 25,000-row registers at once (31 MB); a real FY file is a fraction of this.
4. Saving was slow in LibreOffice (10-41 s); Excel usually saves faster - confirm on the company PC.

1 ISKO Stores FY2027-28 - 30 sheets

Purchase order, receipt (GRN), lot QC, RM issue & return, consumables, authorised adjustments, stock balances. File: **1 ISKO Stores FY2027-28.xlsx**. Sheet order below is the tab order.

#	Sheet	Type	What it holds / does	Who uses it
1	**README**	README / settings	How the book works, sheet order, colour legend, daily routine.	Everyone
2	**PO Entry**	Entry pad	Create a PO (header + lines) with checks; post to PO Header and PO Line registers.	Purchase / Stores
3	**GRN Entry**	Entry pad	Receive lots against open PO lines; theoretical weight, rate and excess checks.	Stores
4	**RM Move Entry**	Entry pad	Issue RM to a machine (creates batch) and record returns against a batch; FIFO suggestion and availability hard stop.	Stores
5	**Cons Entry**	Entry pad	Issue / return consumables with balance hard stop.	Stores
6	**Adjust Entry**	Entry pad	Approved corrections with reason and independent approver (no counts).	Stores + approver
7	**PO Header Register**	Register (values)	One row per PO (no requisition reference).	Read only (posted)
8	**PO Line Register**	Register (values)	One row per PO item.	Read only (posted)
9	**GRN Register**	Register (values)	Every received lot with its permanent Lot ID.	Read only (posted)
10	**Lot QC Register**	Register (values)	QC status per lot (accepted / hold / rejected) and excess decisions.	QC / Purchase
11	**RM Move Register**	Register (values)	All RM issues, returns, offcut/damaged returns, stores scrap, returns to supplier.	Read only (posted)
12	**Cons Receipt Register**	Register (values)	Consumable receipts.	Read only (posted)
13	**Cons Issue Register**	Register (values)	Consumable issues and returns.	Read only (posted)
14	**Adjust Register**	Register (values)	Approved stock corrections (RM lots and consumables).	Read only (posted)
15	**PO Status**	Balance (calculated)	Received and pending quantity per open PO line; feeds GRN dropdown and MIS.	Purchase (read only)
16	**Lot Balance**	Balance (calculated)	Available kg and sheets per open lot, eligibility, value, ageing.	Stores (read only)
17	**Cons Balance**	Balance (calculated)	Consumable stock, value and re-order status.	Stores (read only)
18	**M_Material**	Master	Material identity, grade code (prefix of Lot ID), standard size and sheet weight, minimum level.	Stores head
19	**M_Grade**	Master	Grade codes.	Stores head
20	**M_Supplier**	Master	RM and consumable suppliers with Tally ledger mapping and terms.	Purchase
21	**M_Consumable**	Master	Consumable item list.	Stores head
22	**M_Reason**	Master	Reason codes for rate variance, lot override, adjustment and reversal.	Stores head
23	**M_WhereUsed**	Master	Consumable cost centres.	Stores head
24	**X_Product**	Import (values)	Products for issue purpose (single master owned by Production).	Read only
25	**X_Machine**	Import (values)	Machines for RM issues.	Read only
26	**X_People**	Import (values)	People who receive, issue, approve.	Read only
27	**Posting Log**	Control	Evidence of every posting.	Book owner
28	**Control Totals**	Control	Row counts and totals per register for reconciliation.	MIS / Finance
29	**Settings**	README / settings	Financial year, as-on date, lock date, prefixes, tolerances, data folder.	Book owner only
30	**Lists**	README / settings	Dropdown sources (movement types, forms, statuses, units).	Book owner

2 ISKO Production FY2027-28 - 25 sheets

Cutting, bending, fabrication, rejection & rework, batch balance and close, transaction-calculated WIP. File: **2 ISKO Production FY2027-28.xlsx**. Sheet order below is the tab order.

#	Sheet	Type	What it holds / does	Who uses it
1	**README**	README / settings	How the book works, sheet order, colour legend, daily routine.	Everyone
2	**Prod Entry**	Entry pad	Daily production lines with batch hard stop and duplicate check.	Production supervisors
3	**Rej-Rework Entry**	Entry pad	Record rejections against the source line and rework outcomes.	QC / Production
4	**Production Register**	Register (values)	All production lines (cutting, bending, fabrication).	Read only (posted)
5	**Rej-Rework Register**	Register (values)	Rejection cases and rework outcomes, linked to the original production line.	Read only (posted)
6	**Batch Close Register**	Register (values)	Batch closures with frozen variance.	Production + Stores
7	**Batch Balance**	Balance (calculated)	Issued, returned, output, scrap, kg left, variance and status per batch.	Production (read only)
8	**WIP Balance**	Balance (calculated)	WIP by part and stage from postings only.	Production (read only)
9	**Daily Output**	Report	Output by machine for a chosen date.	Production head
10	**X_Batch**	Import (values)	Open batches issued by Stores, with returns.	Read only
11	**X_Material**	Import (values)	Material list for parts and BOM.	Read only
12	**X_Customer**	Import (values)	Customer list for the product master.	Read only
13	**X_JWCSent**	Import (values)	JWC quantities by part (moves WIP out of the last stage).	Read only
14	**M_Product**	Master	Products / models with customer and coating route.	Production engineering
15	**M_Part**	Master	Drawing, revision, material, weight per piece, coating area, route.	Production engineering
16	**M_BOM_Model**	Master	BOM edition headers.	Production engineering
17	**M_BOM**	Master	BOM lines (drives MIS RM requirement).	Production engineering
18	**M_Stage_Route**	Master	Stage order per part route; final stage and FG point.	Production head
19	**M_Machine**	Master	Machines and their process.	Production head
20	**M_People**	Master	Operators, supervisors, QC, stores, approvers.	HR / Production
21	**M_Reason**	Master	Rejection reasons.	QC
22	**Control Totals**	Control	Reconciliation totals.	MIS / Finance
23	**Refresh Log**	Control	Proof that imports are fresh and complete.	Book owner
24	**Settings**	README / settings	Financial year, as-on date, lock date, prefixes, tolerances, data folder.	Book owner only
25	**Lists**	README / settings	Dropdown sources (movement types, forms, statuses, units).	Book owner

3 ISKO Dispatch & Challan FY2027-28 - 21 sheets

Customer requirement, job-work challan, coater returns, FG balance, delivery challan. File: **3 ISKO Dispatch & Challan FY2027-28.xlsx**. Sheet order below is the tab order.

#	Sheet	Type	What it holds / does	Who uses it
1	**README**	README / settings	How the book works, sheet order, colour legend, daily routine.	Everyone
2	**JWC Entry**	Entry pad	Send parts to a coater: header + lines with availability and rate snapshot.	Dispatch
3	**Coater Move Entry**	Entry pad	Record coater returns OK and defects with decision.	Dispatch
4	**DC Entry**	Entry pad	Dispatch to customer with FG / JWC hard stops and frozen UOM and rate.	Dispatch
5	**Requirement Register**	Register (values)	Customer schedules with versions; pending from DC lines quoting Req ID.	Dispatch / Sales
6	**JWC Header Register**	Register (values)	One row per job-work challan.	Read only (posted)
7	**JWC Line Register**	Register (values)	Parts sent to coaters.	Read only (posted)
8	**Coater Move Register**	Register (values)	Coater opening (cut-over), returns OK, defects with decision and debit.	Read only (posted)
9	**DC Header Register**	Register (values)	One row per delivery challan.	Read only (posted)
10	**DC Line Register**	Register (values)	Delivery lines.	Read only (posted)
11	**Open JWC Balance**	Balance (calculated)	Material pending at each coater by JWC line with ageing.	Dispatch (read only)
12	**FG Balance**	Balance (calculated)	FG available by part for the dispatch hard stop.	Dispatch (read only)
13	**M_Customer**	Master	Customers with GSTIN, ledger, default dispatch UOM.	Dispatch / Accounts
14	**Customer Price & UOM**	Master	Sale rate, unit and weight per unit per customer-product.	Dispatch / Accounts
15	**M_Vendor**	Master	Powder coaters / sub-contractors.	Dispatch
16	**Coater Rate**	Master	Coating rate history.	Dispatch / Accounts
17	**X_Product**	Import (values)	Parts with weight and coating area.	Read only
18	**X_ProdOutput**	Import (values)	What production can send on job work.	Read only
19	**Control Totals**	Control	Reconciliation totals.	MIS / Finance
20	**Settings**	README / settings	Financial year, as-on date, lock date, prefixes, tolerances, data folder.	Book owner only
21	**Lists**	README / settings	Dropdown sources (movement types, forms, statuses, units).	Book owner

4 ISKO MIS FY2027-28 - 14 sheets

Read-only reporting: refresh log, control tower, exceptions, stock/production/dispatch reports, trace, monthly pack. File: **4 ISKO MIS FY2027-28.xlsx**. Sheet order below is the tab order.

#	Sheet	Type	What it holds / does	Who uses it
1	**README**	README / settings	How the book works, sheet order, colour legend, daily routine.	Everyone
2	**Control Tower**	Report	Director KPIs, data-freshness banner and dispatch trend.	MD / heads
3	**Exceptions**	Report	Open exceptions by owner and age.	Each owner; MD reviews
4	**Refresh Log**	Control	Proof of freshness and completeness of every extract.	MIS owner
5	**Stock & WIP**	Report	RM, WIP, at-coater, FG and consumable positions.	Directors / Finance
6	**Production & Yield**	Report	Output, yield, scrap, rejection trend.	Production head
7	**Dispatch & JWC**	Report	Dispatch and coating trend.	Dispatch head
8	**RM Requirement**	Report	Purchase need by material for PO decisions.	Purchase
9	**Lot Trace**	Report	End-to-end trace of one lot by IDs.	Anyone
10	**DC Trace**	Report	Backward trace from a delivery challan.	Anyone
11	**MRM Monthly**	Report	Monthly management review pack.	MD
12	**X_KPI_Month**	Import (values)	Monthly KPI summary (Power Query output).	Read only
13	**X_Balances**	Import (values)	Current stock positions.	Read only
14	**Settings**	README / settings	Financial year, as-on date, lock date, prefixes, tolerances, data folder.	Book owner only
